DANA MALAEB

Abu Dhabi, UAE • (+971)507148188 • dz.malaeb@gmail.com

PROFESSIONAL SUMMARY

With 8+ years in the Oil & Gas industry, I have built a career around materials and corrosion engineering, asset integrity and project management, ensuring operational reliability, safety, and cost efficiency across various onshore and offshore projects. Dedicated to safeguarding the performance of clients' assets, minimizing risks, and maximizing operational efficiency. Committed to safety, sustainability, and continuous improvement to deliver exceptional value and build lasting client partnerships.

EXPERIENCE

WOOD PLC | ABU DHABI, UAE

Sr. Materials & Corrosion Engineer | January 2025 – Present

• Working with Wood Consulting in providing integrity solutions to customers throughout their asset life cycle.
• Supporting project execution by providing corrosion expertise during design, construction, and commissioning phases.
• Coordinating with multidisciplinary teams, including process, mechanical, and piping engineers, to ensure corrosion control integration.
• Leading the development and review of material selection studies of offshore and onshore assets.
• Developing and maintaining corrosion control philosophies and strategies to ensure asset integrity.
• Providing technical guidance on material compatibility and selection based on service conditions and process parameters.
• Applying industrial recommended practices, as well as knowledge of API, ASME, NACE, ISO, DNV and NORSOK standards, Shell DEP standards and operator codes.
• Conducting corrosion risk assessments to identify potential degradation mechanisms.
• Evaluating and recommending chemical treatment programs for corrosion inhibition and mitigation.
• Performing corrosion modeling and simulations to predict material degradation and ensure long-term asset reliability.
• Assessing corrosion damage, developing corrosion monitoring programs and recommending corrective actions.
• Implementing erosion assessments via DNVGL-RP-O501 and performing sand risk management studies.
• Defining painting, coating, and lining specifications, and ensuring compliance with industry standards.
• Engaging in design reviews, vendor document evaluations, and problem-solving activities in specialized areas.

Project Engineer | April 2020 – Present

• Developing a trusted advisor relationship and managing accounts with key client stakeholders.
• Taking on project management responsibilities including project planning, project scheduling, resource allocation, cost estimation, budget management and stakeholder engagement.
• Participating in audits, site-visits and workshops and ensure the implementation of best practices throughout projects.
• Developing detailed project execution plans, schedules and KPIs to monitor/track progress.
• Contributing to managing project performance, mitigating risks and forecasting activities.
• Managing client relationships and meeting with stakeholders for regular briefings.
• Maintaining strong communication with stakeholders and ensure client satisfaction upon project delivery.
• Building a strong network of contacts and leveraging it for business development.
• Participating in interviewing processes and assisting with training young engineers.
• Developing technical and commercial proposals offering technical consulting services.
• Proactively using a CRM database to ensure accurate maintenance of client data and pipeline management.

Materials & Corrosion Engineer | March 2021 – December 2024

Jr. Materials & Corrosion Engineer | March 2019 – March 2021

SCHLUMBERGER (SLB) | ABU DHABI, UAE

Reservoir Engineering Intern | July 2018 – February 2019

• Trained with the Software Integrated Solutions (SIS) segment in providing consultancy to customers in the oil and gas industry.
• Performed PVT review and EOS fluid characterization for ADNOC's Re-development Study of the Bab and Umm Shaif depleted oil rim reservoirs.
• Conducted enhanced oil recovery (EOR) screening for Petrogas' Rasha Field Development Plan (FDP) in Oman.
• Completed a preliminary data review, ran basic RE analysis and well test re-interpretation, and analyzed analogue fields for Crescent Petroleum's Concept Development Plan of oil fields in Iraq.
• Contributed to the completion of field development plans (FDP) reports.

AUB DEPARTMENT OF CHEMICAL AND PETROLEUM ENGINEERING | BEIRUT, LEBANON

Research Assistant | September 2017 – June 2018

• Conducted literature reviews on oil and gas exploration and development in the Levant Basin.
• Studied the collected data and analyzed well logs to be used in the uncertainty management of oil and gas development in Lebanon.
• Determined geological correlations in the Levant Basin and performed exploratory data analysis of the reservoir characteristics offshore Lebanon.
• Presented progress and findings on a weekly basis to the research team.

SUSTAINABLE ENVIRONMENTAL SOLUTIONS (SES) | SIN EL FIL, LEBANON

Environmental Consultant | April 2016 – October 2016

• Provided expertise and advisory services on areas including waste management policies, sustainability and energy solutions and human health and safety guidance.
• Collaborated with the UNDP and public authorities in the Bekaa region to improve energy efficiency and introduce solid waste management schemes.
• Conducted field surveys to collect data about levels of pollution and contamination at sites and areas of consideration.
• Carried out the Initial Environmental Examination (IEE) of the Ghazze Dumpsite Rehabilitation and Sanitary Design project, in collaboration with the UNDP.
• Developed the proposal "PCB Management in the Power Sector in Lebanon" funded by the World Bank.

SKILLS

Languages: Proficient in Arabic and English.

Soft Skills: Adaptability, Agility, Communication, Critical Thinking, Innovation, Leadership, Problem Solving, Team Building.

Technical Skills:

• MS Office 365
• MS Project
• Electronic Corrosion Engineer (ECE)
• NEXUS Integrity Centre (NEXUS IC)
• Veridian (Vibration, Dynamics, and Noise)
• Power BI
• Aspen HYSYS
• Aspen Plus
• AutoCAD
• Petrel (Subsurface Software)
• ECLIPSE (Reservoir Simulator)
• FluidModeler (Fluid Analysis)
• KAPPA (Dynamic Data Analysis)
• Laboratory Virtual Instrument Engineering Workbench (LABVIEW)
• SQL
• Python
• C++
• MATLAB
• Java

PROJECTS ACCOMPLISHED

• Material Selection and Corrosion Control Studies for Project 5.0 Asab, Bu Hasa, Habshan and Habshan 5 Facilities for ADNOC Gas
• Material Selection Studies for ADNOC Sour Gas FEED Services for Shah Gas 1.85 BSCFD Expansion and CO2 Recovery Project
• Zubair Hammar TEG Dehydration Facility Corrosion Management Framework for Basrah Gas Company (BGC)
• BNGL Corrosion Management Framework for Basrah Gas Company (BGC)
• Material Selection and Corrosion Control Studies for the Associated Gas Upstream Project (AGUP) Ph-1 (FEED) Project for TotalEnergies in Ratawi, Iraq
• Development of Corrosion Management Frameworks (CMFs) for Brunei Shell Petroleum's (BSP's) Offshore Assets
• Material Selection and Corrosion Studies for the Habshan Upper Recovery and Lekhwair +20MBD Project for ADNOC Offshore
• Material Selection and Corrosion Studies for the Lower Zakum EPS-2 and PDP Project for ADNOC Offshore
• Pipeline and Flowline Integrity Management System (PIMS) Support to ADNOC Onshore
• Material Selection for the Conceptual Design Stage of the Acid Gas Diversion Project for ADNOC
• Material Selection and Coating Specifications for Oil and Gas Early Production Facilities for JODCO in the UAE
• Development of Corrosion Control Documents (CCD) for ADNOC LNG
• NEXUS Pipeline Integrity Management Upgrade for North Oil Company (NOC) in Qatar
• Development of Asset Integrity Standards for ADNOC Onshore
• Project Managing the Development of Asset Integrity Standards for ADNOC Onshore
• Project Managing the Fracture Control Study for Al Reyadah CO2 Expansion Project for ADNOC Onshore
• Material Selection Studies for Offshore Platforms for Brunei Shell Petroleum (BSP) in Brunei
• Integrity Management Services of Offshore Assets for Brunei Shell Petroleum (BSP) in Brunei
• On-Stream Inspection (OSI) Development for Saudi Aramco Assets
• Project Managing Brunei Shell Petroleum Projects ($1M+)
• Material Selection Report for CP07 Complex Rejuvenation (Upstream) for Brunei Shell Petroleum (BSP) in Brunei
• Pressure Equipment Integrity System Build for Legacy and Operating Assets for Basrah Gas Company (BGC) in Iraq
• ADNOC Re-development Study for Depleted Oil Rim Reservoirs Bab Thamama Units C/D/Units 6&7 and Umm Shaif Uweinat
• Crescent Petroleum Concept Development Plan for Iraqi Oil Blocks Neighboring Iranian and Kuwaiti Borders
• EOR Screening for Petrogas' Rasha Field Development Plan in Oman
• SPE Workshop: Lebanon Offshore Oil and Gas Exploration and Development

EDUCATION

JUNE 2018

B.E. Chemical and Petroleum Engineering | American University of Beirut (AUB) | Beirut, Lebanon

Final Year Project: Design of a Facility to Produce Acrylic Acid from VGO via Aspen HYSYS

Honors and Awards:
• Graduated cum laude (GPA: 3.5)
• Dean's Honor List, 2013-2018
• Abdul Ghani Hammour Scholarship, 2015-2018

JUNE 2013

High School Diploma | International School of Choueifat (SABIS) | Ruwais, UAE

Honors and Awards:
• GPA/100: 93
• SABIS Student Life Training Camp | Bath, UK
