Abdullah Shehata – Saudi Transferable Visa
00966-544430155 | asrady@gmail.com | AlKhobar - Saudi Arabia

Personal Summary:

Dynamic and results-oriented professional with a strong background in control, instrumentation, mechanical valves, and actuators. Demonstrates high levels of accuracy, attention to detail, and excellent organizational skills. Confident communicator with the ability to effectively engage with stakeholders at all levels.

I am a positive, self-motivated individual who thrives both in team environments and when working independently. My hands-on experience and technical expertise across diverse fields enable me to understand client requirements, provide sound advice, and propose tailored solutions that align with customer needs and budgets.

Currently available for immediate joining, I am seeking a key support role within an innovative and growth-driven organization where I can leverage my skills to contribute to success and pursue professional development.

Work Experience:

Pietro Fiorentini – Saudi Arabia

Sep. 2022 – Oct. 2024: Regional Sales Manager.

Duties & Responsibilities:

- Participated in the prequalification process for Pietro Fiorentini's Saudi branch facility.
- Evaluated inquiries from key end users, including Aramco, ADNOC, PDO, and KOC.
- Promoted Pietro Fiorentini products in Gulf markets through strategic engagement.
- Organized technical meetings and seminars with key accounts, oil producers, and end users.
- Conducted regular visits to end users across the GCC region to strengthen relationships.
- Negotiated agreements with local agents and potential business partners.
- Coordinated field trials for wet-gas and water-cut meters with end users.
- Managed the registration of Pietro Fiorentini with service providers and drilling companies.
- Maintained regular follow-ups and prepared monthly reports on opportunities and competitor activities.
- Engaged with oil & gas EPCs and well-testing service companies through regular visits.
- Monitored new Aramco CRPOs projects and provided detailed updates to management.
- Worked with Sadara to secure approvals for gas pressure regulators.
- Promoted newly approved products to EPCs and generated business for the well-testing service team.
- Drafted offers and rental agreements for mobile MPFM units.
- Built and maintained strong customer relationships, resolving issues promptly in collaboration with management.
- Coordinated with the head office to promote innovative PF products not yet introduced to the region, including ultrasonic flow meters for gas applications, gas meters, gas pressure regulators, smart water meters, and process packaging.

ALIAXIS Gulf – Saudi Arabia

Sep. 2021 – August 2022: Regional Sales Manager – Utility & Industry.

Duties & Responsibilities:

- Monitor projects and engage with consultants, engineers, contractors, water companies, ministries, and project owners to increase the presence of Aliaxis Industry & Utilities products, particularly FIP, Friatec, Straub, and Durapipe, in specifications and approvals.
- Identify potential customers, partners, and OEMs for Aliaxis products and services.
- Coordinate specification and sales opportunities with export managers, local distributors, and Aliaxis group project managers to secure orders with local contractors when needed.
- Provide consultation and suggest tailored solutions from the Aliaxis Industry & Utilities product portfolio, especially for applications like water treatment plants.
- Train, educate, and support stakeholders, local distributors, and customer sales teams to enhance product knowledge and specification practices.

- Participate in local and regional trade shows and organize seminars and conferences to promote Aliaxis products.
- Gather and report market intelligence on competitor activities, market trends, project developments, new product ideas, and specifications to Aliaxis marketing and export managers.
- Foster collaboration with local colleagues, export managers, and management to develop strategies, achieve goals, and identify cross-selling opportunities.
- Prepare and submit detailed written reports as required by the business.
- Assist Aliaxis companies in obtaining market approvals and registrations.

CRANE ChemPharma & Energy (CPE) - Saudi Arabia

Sep. 2019 – April 2021: Sales Account Manager – Utility & Industry.

Duties & Responsibilities:

- Achieve sales plan objectives and targets as agreed upon.
- Initiate and lead the pre-qualification process with end users for MRO and project business, focusing on Crane products not currently listed on the AML.
- Identify and convert MRO opportunities with major end users, including SWCC, SEC, and MARAFIQ.
- Develop a structured visit plan per customer location, outlining strategies to secure business.
- Pursue project opportunities with key EPCs and integrators to maximize market penetration.
- Formulate a growth strategy for the power and water markets within Saudi Arabia and Bahrain, including actionable plans, timelines, and distributor agreements.
- Ensure Crane products are listed as approved suppliers with major customers in the territory, establishing Crane as the preferred manufacturer/supplier.
- Manage local project opportunities by identifying, implementing, and coordinating winning strategies.
- Gather and share project information with relevant sales teams to support collaborative efforts.
- Analyze and report on competitor, technical, and commercial data to stay competitive.
- Build and maintain strong relationships with key decision-makers at end users, OEMs, and engineering companies.
- Coordinate with product managers, manufacturing, and design centers to optimize business opportunities and establish a foundation for future growth.
- Provide weekly and monthly reports on territory sales progress, objectives, and emerging opportunities.

Sunbelt Supply Arabia – Saudi Arabia

Feb. 2018 – Aug. 2019: Sales Account Manager - Petrochemical Industry.

Duties & Responsibilities:

- Develop and manage new and existing strategic accounts to drive growth.
- Enhance brand awareness and support business expansion in the Middle East region.
- Manage and support partners and resellers to achieve sales and profit targets.
- Follow up with representatives and customers to resolve issues and provide solutions.
- Identify and communicate strengths, weaknesses, opportunities, and competitive insights.
- Handle registration and pre-qualification processes for company products.
- Qualify and evaluate sales inquiries to ensure alignment with business goals.
- Assess market requirements and analyze competitor capabilities to identify opportunities.
- Prepare accurate and timely quotations in response to customer inquiries.
- Explore new market opportunities in key sectors, including petrochemicals, power, water, and wastewater.
- Organize and deliver presentations to customers to showcase product offerings.
- Provide regular weekly and monthly reports to management on progress and developments.
- Promote manual valve products from various manufacturers, including VELAN, Pentair, KTM, Vanessa, OMB, NIBCO, Apollo, and CRANE.
- Market actuators from leading brands such as BETTIS, Air Torque, Elomatic, ROTORK, and Flowserve.
- Offer complete automated valve package assemblies from approved manufacturers.

Endress+Hauser Arabia LLC- Saudi Arabia
Feb. 2014 - Jan. 2018: Senior Sales Engineer – Petrochemical Industry.
Duties & Responsibilities

- Identify and generate new leads, inquiries, and project opportunities.
- Follow up on potential business opportunities to ensure successful outcomes.
- Prepare visit reports, forecast potential projects, and develop a market coverage plan.
- Build and maintain strong relationships with end users, E&PM, and SABIC contractors.
- Provide engineering support to SABIC engineers, advising on the selection of E+H products to replace competitor equipment (SIEMENS, ABB, YOKOGAWA, EMERSON).
- Draft offers and project proposals for instrumentation solutions.
- Perform sizing calculations for flow, DPT applications, and thermo-well installations.
- Create detailed data sheets for customer approval covering various instrumentation needs.
- Conduct regular meetings with end users and contractors to understand their requirements.
- Visit sites alongside construction contractors to support LSTK projects.
- Prepare quotations, bills of materials (BOM), and project proposals for LSTK instrumentation and liquid analytical solutions.
- Participate in kickoff meetings with affiliate engineers and SABIC E&PM teams.
- Address technical clarifications and negotiate with buyers to ensure project alignment.
- Provide feedback to the Global Strategic Account Manager for implementing global purchase agreements with SABIC.
- Organize technical exchange meetings at SABIC affiliates and other petrochemical plants.
- Coordinate and participate in industry exhibitions and SABIC STIM events.

SIEMENS System Integrator (Tricom Controls S.A.E) - Egypt
Feb. 2012 – Jan .2014: Instrumentation & Service Engineer.
Duties & Responsibilities:

- Analyze client RFQs, tenders, and project requirements for instrumentation solutions.
- Meet with customers to understand user needs and develop tailored proposals.
- Review P&ID drawings, instrument lists, hook-up drawings, and cable schedules to ensure accuracy and compliance.
- Conduct site surveys to assess project requirements and conditions.
- Supervise the installation of instruments, including hook-ups, tubing, and accessories.
- Oversee cable pulling, termination, and the installation of cable trays on site.
- Manage the on-site installation of panels and junction boxes to ensure proper setup and functionality.

Advanced Electronic Engineering (AEE) - Egypt
Aug. 2007 - Jan. 2012: Instrumentation & Control Engineer.
Duties & Responsibilities:

- Assist the sales team in developing proposals and solutions tailored to customer needs.
- Meet with customers to understand their requirements and provide customized proposals.
- Analyze client RFQs, tenders, and project specifications to formulate competitive offers.
- Study and propose control systems for water and wastewater plant projects.
- Source and evaluate supplier offers to ensure optimal solutions.
- Engage in discussions and negotiations with clients to finalize proposals.
- Coordinate internally with relevant departments to ensure seamless project execution.
- Install, program, and calibrate automatic control and measuring instruments, including:
    - Flow meter transmitters (Fuji Electric, ISOIL, FLEXIM)
    - Level transmitters (NIVALCO, VEGA)
    - Pressure transmitters (WIKA, TECSIS, FUJI)
    - Liquid analyzers (Endress+Hauser)
- Provide comprehensive control solutions, including PLC and SCADA system selection (GE-Fanuc).
- Oversee the installation of inverters (AC/DC speed control drives) and configure them based on application requirements, considering either equipment specifications or customer preferences.

- Offer on-call technical support to maintenance engineers and technicians during the observation period to resolve any issues.
- Supply essential components for motor control, including magnetic contactors, industrial relays, manual motor starters, and solid-state contactors.
- Provide MCCBs and earth leakage protective relays to LV panel builders.
- Supply low-voltage air circuit breakers to ensure reliable electrical protection.

Field of Experience:

- Speed controllers for precise motion and process control.
- Measurement and control applications for flow, level, pressure, and temperature.
- Data recording solutions, including electrical counters, timers, and frequency meters.
- Weighing and batching systems for accurate material handling.
- Operator control and monitoring systems to ensure efficient process management.
- Programmable Logic Controllers (PLCs) for automation and control.
- Manual valves, including ball, butterfly, gate, globe, check, and diaphragm types.
- Pneumatic and electric actuators for automated valve operation.
- MPFM (Multiphase Flow Meters) and gas regulators for flow measurement and regulation.

Qualifications:

- B.Sc. of Electrical Power Engineering- Aswan University – May 2007.
- Graduation: Good.

Training Courses:

- Project Management Professional (PMP).
- SCADA System (SIEMENS WINCC).
- PLC Siemens (S7-200).
- Automatic Control (Relays and Contactors).
- Domestic Electrical Installation.
- AutoCAD2D.
- International Computer Driving Licenses (ICDL).

General Skills:

- Fluent in working on Sales Force Dot Com (SFDC) Environment.
- Lotus Notes-Word- Excel-PowerPoint- Outlook.

Languages:

- Arabic: Native.
- English: Very Good.

Personal Information:

- Date of Birth: 17/4/1982.
- Nationality: Egyptian.
- Marital Status: Single.
